

STRATEGIC MAPPING OF ECONOMIC AND SOCIAL ACTIVITIES FOR THE COMMUNITY DEVELOPMENT OF INDIGENOUS COMMUNITIES.

YASMIN CRUZ CRUZ

INTRODUCTION

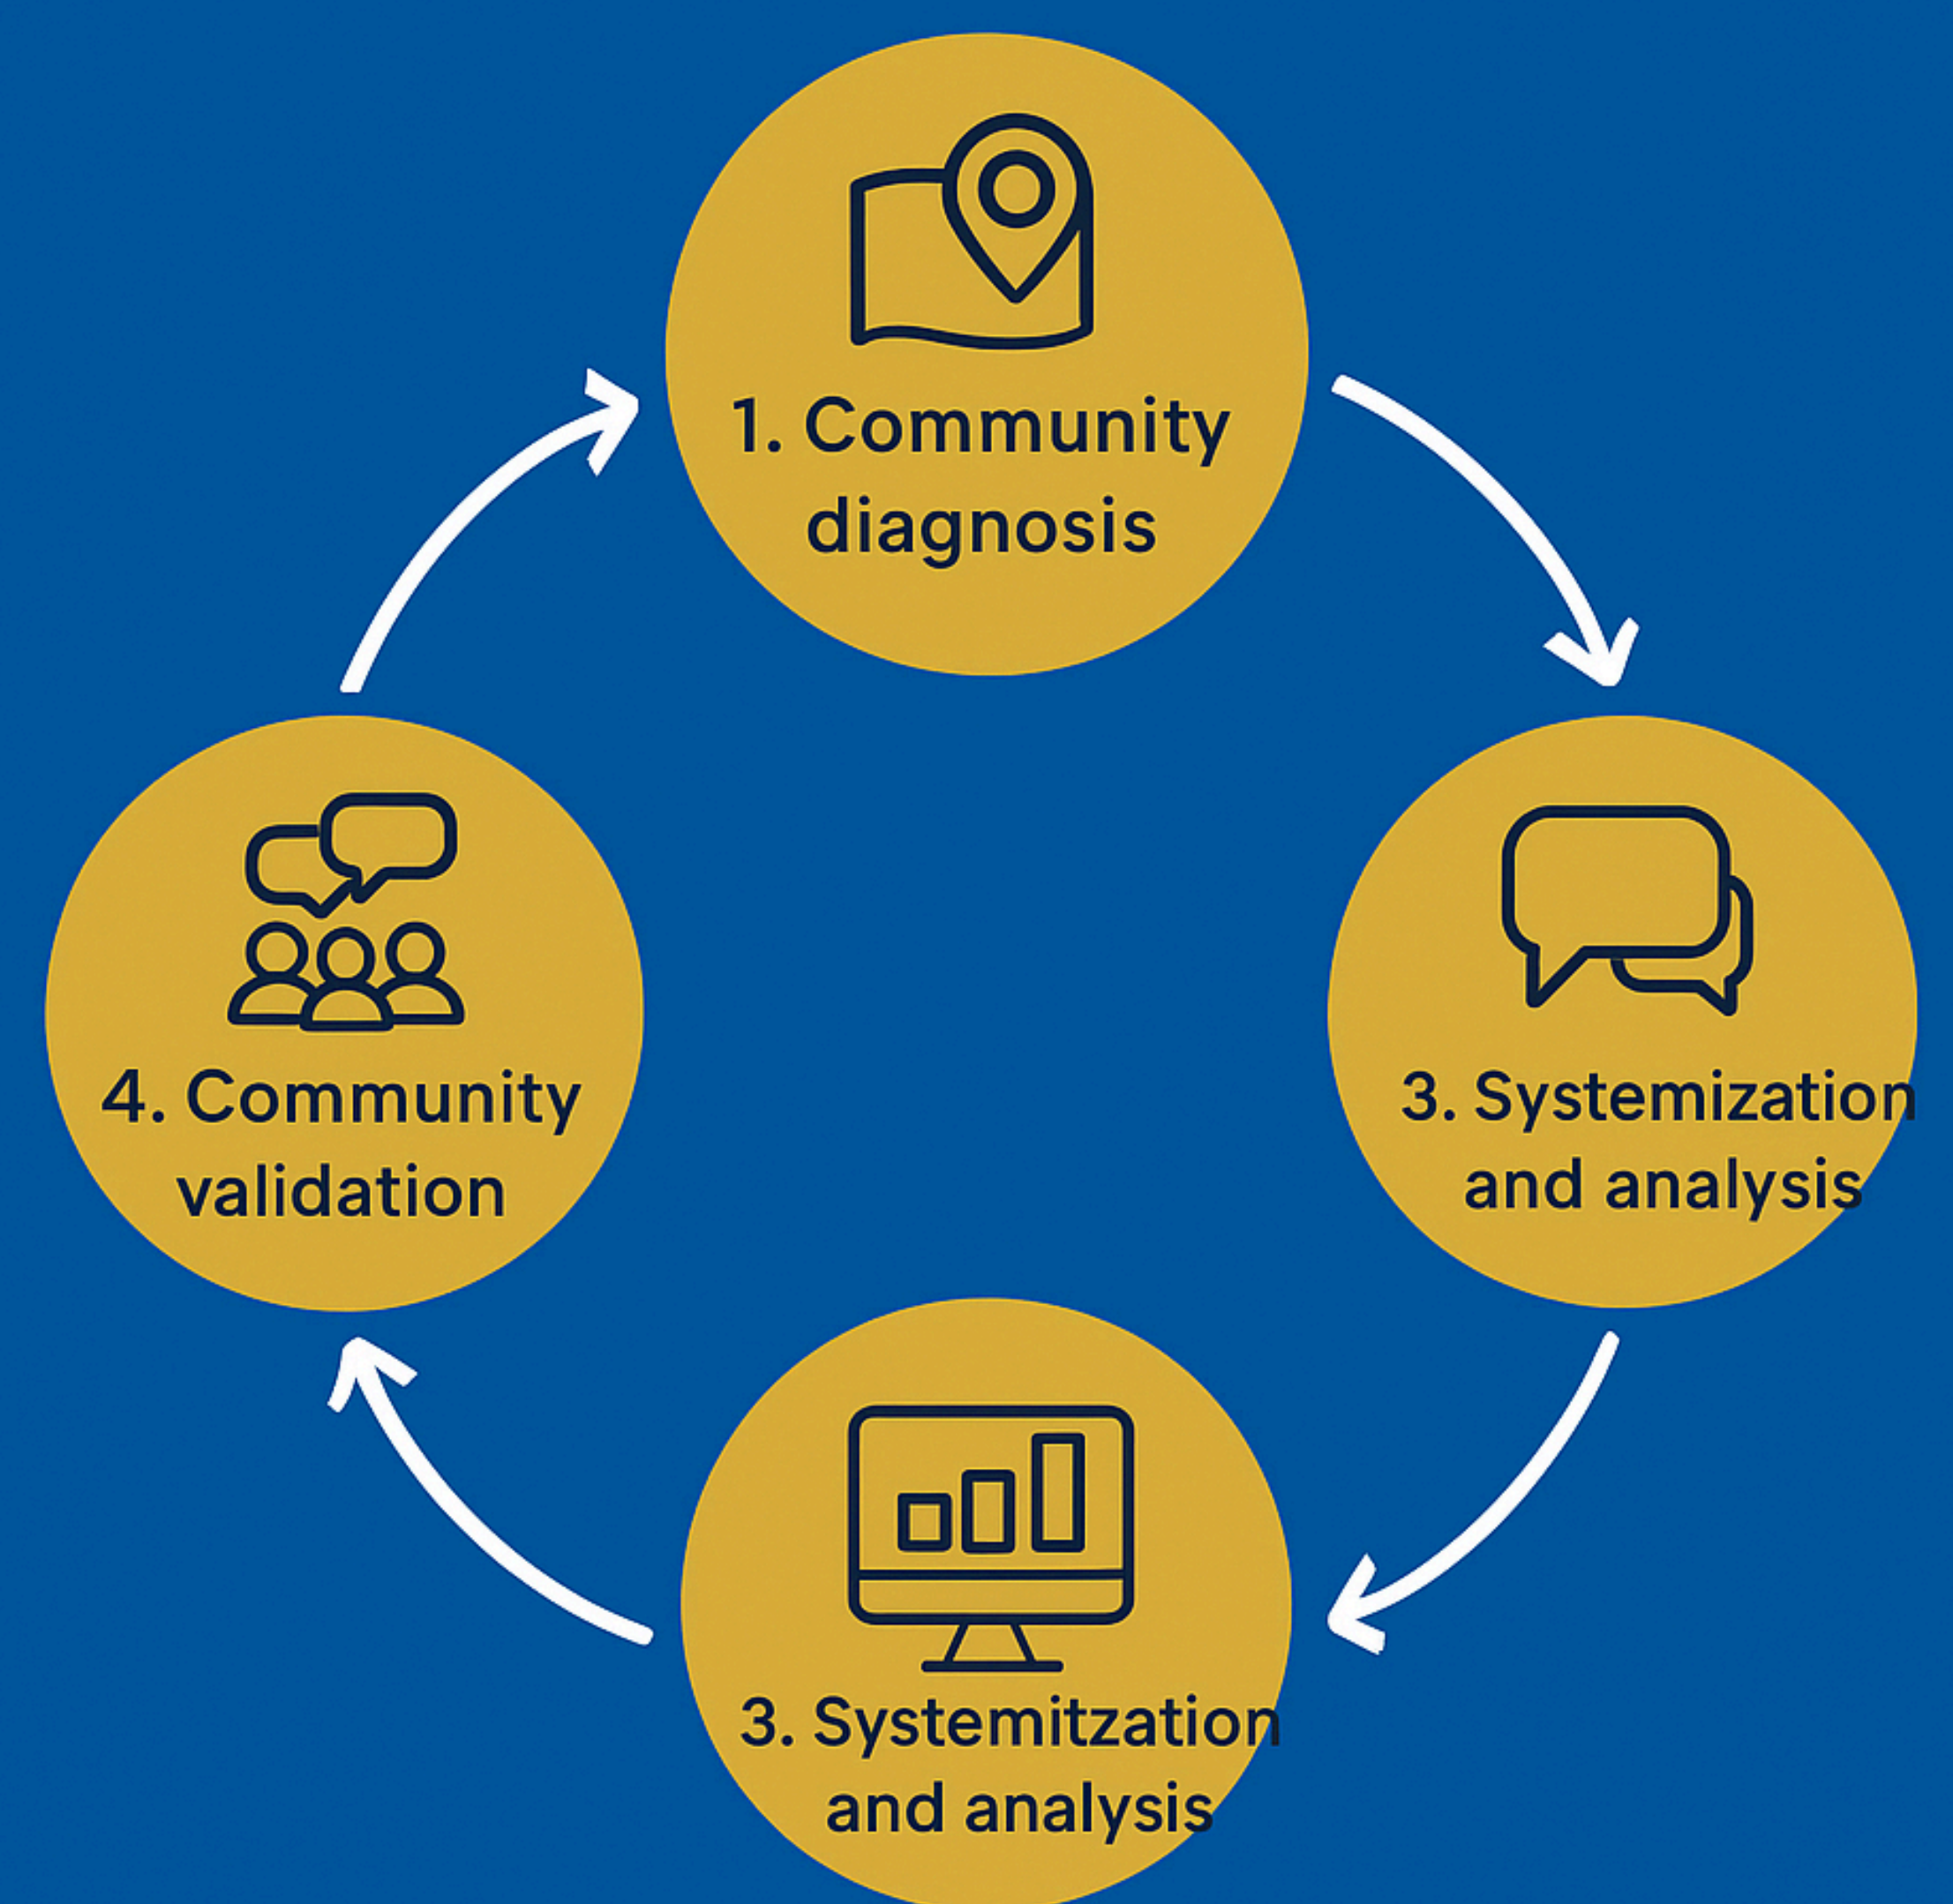

- Traditional development models fail to address Indigenous needs.
- Persistent marginalization and exclusion limit access to opportunities.
- Strategic mapping enables recognition and empowerment of local capacities.
- Focus: Náhuatl community of Tonalapan, Veracruz.

PROBLEM

- Poverty persists despite government programs.
- Lack of localized data and contextual understanding.
- Language and cultural diversity as barriers to inclusion.
- Need for community-driven, culturally sensitive strategies.

METHODOLOGY

Participatory Action Research (PAR)

OBJECTIVES

General:

- Identify and systematize economic and social activities to promote sustainable community development.

Specific:

- Conduct participatory diagnosis of current practices.
- Evaluate impact and sustainability.
- Identify barriers and opportunities.
- Develop localized strategies and recommendations.

JUSTIFICATION

- Generates knowledge from and for Indigenous communities.
- Promotes autonomy, participation, and intercultural understanding.
- Supports evidence-based public policy for sustainable development.

EXPECTED RESULTS

- Inventory of economic and social activities.
- Analysis of their community impact.
- Strategic proposals for strengthening and diversification.
- Replicable model for Indigenous territorial planning.
